Assessment Type: Case Study

Weighting: 60%

Due Date: October 09, 2025, 11:59 pm

Total Marks: 100

Student declaration – I/we confirm that:

- This original assessment is entirely our own work.
- Where I/we have used ideas, tables, diagrams, etc., of other writers, I have acknowledged the source in every case.
- This assessment has not previously been submitted as assessed work for any academic course.

Assessment Mapping

After completing this assessment, the student(s) will have to meet the following learning outcomes related to the graduate profile outcome.

Graduate Profile Outcome	Learning Outcome	Part 1 Step 1	Part 1 Step 2	Part 1 Step 3	Part 2
Apply knowledge of risk management frameworks to perform cybersecurity risk assessments and communicate the results to support the organisational risk management process.	1. Apply cybersecurity frameworks to assess cybersecurity risks in an organisation to communicate the results to decision-makers.	✓	✓		✓
Behave with integrity as a responsible IT professional, in accordance with legal and organisational regulatory requirements, applying professional and ethical practices.	3. Apply professional and ethical practices in cybersecurity management.			✓	

Assessment instructions:

- You will work in a team of a maximum of 3 to complete this assessment.
- This assessment consists of 3 parts:
Part 1 – Cybersecurity risk assessment
Part 2 – Oral presentation
Part 3 – Peer evaluation
- Read the case study provided in **Moodle under the Assessment Section**.
- You will apply your professional and ethical practices to assess cybersecurity risks and communicate your findings to the decision-makers.
- Your findings for part 1 must be research-based and presented in the form of an investigation report with a word count of 2500 [+/- 10%], excluding the reference list, table of contents and any other administrative sections (e.g., appendix)
- Your investigation report must be professional and well organised. A recommended format for the report is:
 - Title page
 - Investigation summary
 - Table of contents
 - Analysis (i.e., part 1)
 - Findings and recommendations
 - References
 - Appendix or Appendices (if any)
- Correctly reference your used sources in-text and include a full reference list at the end of the report, using APA 7th or IEEE guidelines.

Assessment submission instructions:

- Your investigation report must be presented in the recommended format stated above and must have margins and page numbers.
- Upload your report to the Moodle link “**Upload Assessment 2 Here**”.

Case study task:

- The assessment work of this case study includes analysis and investigation of a realistic scenario to address the cybersecurity risk management of an enterprise from the perspective of New Zealand corporates.
- For this enterprise cybersecurity risk assessment and investigation, use the **ESRM** model. The case study instruction and the scenario can be found in Moodle's assessment section for this course.
- As a cybersecurity expert, you believe that the **ESRM** model can be used for analysing, investigating, and developing a report applicable to New Zealand enterprises.
- Assess the cybersecurity risks for the enterprises using the **ESRM** model and communicate the findings to decision makers. You need to complete the three parts given below to achieve this.

Part 1: Cybersecurity risk assessment

[Total 85 marks]

Instructions:

- Prepare an investigation report which must include the steps given below.
- The format and word count for the investigation report is specified in page 3.

Step 1

(20 marks)

Provide an overview of the **ESRM** used for enterprise cybersecurity risk management.

Step 2

(20 marks)

Apply the **ESRM** model to assess the cybersecurity risks for the NZ enterprise.

Step 3

(20 marks)

As an IT professional, you are bound by the New Zealand ITP code of ethics.

It would help if you considered its tenets when applying professional and ethical practices to manage the cybersecurity of the enterprise.

While applying the **ESRM** model for the enterprise, ensure that the objectives of each domain comply with the ITP code of ethics tenets.

Part 2: Oral Presentation

[Total 20 marks]

Communicate your findings from Part 1 for the cybersecurity management of the enterprise based on your application of the **ESRM** model.

This should help the CEO and the governance team of the enterprise to make decisions on the feasibility of using this model.

The date for oral presentations will be provided by your lecturer.

Instructions:

- Your presentation will be 15 minutes long allowing 5 minutes for each team member to speak.
- The structure of your presentation needs to include the following: introduction, tasks and conclusion/summary.
- You will prepare a visual presentation using Microsoft PowerPoint or similar software.
- Your presentation may be recorded for marking and moderation purposes.

- Familiarise yourself with the attached observation checklist to ensure you meet the requirements. Your lecturer will complete the attached observation checklist for each team member.

Presentation observation checklist

Name of Student(s):

Name of Observer:

Date of Presentation:

Indicate if the student(s) meet the criteria during the process of achieving the objective. Use the space to add a comment for feedback to the student(s) and for moderation purposes.

Criteria	Max Marks	Your mark	Comment
Content: Student demonstrates full knowledge with explanations and elaboration.	4		
Structure: The student presents information in a logical, interesting sequence that audience can follow.	4		
Body language (includes movement and gestures, voice, speed, eye contact, clarity, tone, and good rapport with the audience)	3		
Answer to Questions Students answer questions appropriately	4		
Timing The student spoke for 5 minutes	2		

Effective use of visual aids	3		
TOTAL	20		
Extra Notes:			

Observer's Signature:

Date:

Part 3: Peer evaluation

[Total 5 marks]

- Use this form to evaluate your peer. Write your name and the name of the person you are evaluating.
- Each of the criteria is worth 1 mark. You can assign any value between 0 to 1.

Peer Evaluation Form

Your name:

Team member's name:

Evaluation Criteria	Team member
Regularly attends meetings	
Demonstrates a cooperative and supportive attitude.	
Contributes meaningfully to discussions.	
Completes assigned tasks on time.	
Prepares work in a quality manner.
